People who solved `itertools.combinations()` attempted this next:

itertools.combinations\_with\_replacement()

Find all the combinations of a string with replacements.

Solve Challenge

Submitted Code

Language: Python 3

Open in editor

```
1 # Enter your code here. Read input from STDIN. Print output to STDOUT
2 from itertools import combinations
3 S, N = input().split()
4 for n in range(1, int(N)+1, 1):
5     print(*[''.join(i) for i in combinations(sorted(S), int(n))], sep='\n')
6
```
